

We're handing
them the future
because the future
is in their hands.

With over 25 years of industry experience, we have combined our knowledge of servicing and managing student health insurance plans with powerful technical capabilities components to build a next generation student health insurance management platform.

One system made simple.

With one login, students have access to do it all. Students can waive, enroll, and purchase ancillary products using an online shopping cart. Administrators have more insight and control using our data and automation-focused approach to managing student health insurance – allowing you to spend more time on student care and less on manual tasks.

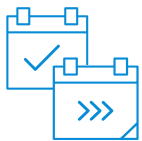

Do more with mobile.

Students can use their smart phones to do almost anything - including managing their health insurance. Our online student platform was built for mobile first. This approach puts the mobile experience at the forefront of the development and design process resulting in a truly seamless and modern experience.

We're better together.

Our platform offers more integrations between us and our clients and partners. When we align our technology using custom integration setups, we can transfer information in real-time while eliminating the need for manual work. It's an easier way to gather data and access reports – allowing for a clear visualization of student health plan management.

Technology for today and tomorrow.

We've assessed the needs of students, college and university administrators, and our carrier partners. With this information in mind, our development team built a flexible platform using powerful technical toolsets to accommodate today's environment with enough scale to adapt to the needs of tomorrow.

Safety First.

Keeping your students' data safe is a top priority. Our system and processes are aligned to deliver a secure and intelligent solution that protects your information and mitigates risk. We are currently in pursuit of the esteemed HiTrust certification.

Putting CARE at the forefront.

Our technology is designed to supplement the CARE we provide to you and your students – not replace it. When you partner with AHP, you will have concierge-level service from a team of dedicated student health professionals.

We'd love to show you more.
